Subject: Change Order Request - Scope Variation Under Contract ENG-2025-112

Dear Ms. Alvarez,

I am writing to formally request a change order under Section 8 (Changes and Variations) of our Engineering Services Agreement (ENG-2025-112) for the Harborview Terminal Modernization project.

Following the geotechnical survey completed on June 5, 2026, our project team has determined that the original foundation design must be revised to account for subsurface conditions that were not identified during the tender phase. The required changes to scope are as follows:

1. Additional Deliverables:
   - Revised foundation and pile-cap drawings for Zones B and C
   - Updated structural load calculations and a supplementary geotechnical report
   - One additional design review workshop with the client's engineers

2. Schedule Impact:
   - We understand this variation will extend the design phase by approximately four (4) weeks, moving the design freeze milestone from August 14, 2026 to September 11, 2026.

3. Commercial Impact:
   - Estimated additional engineering effort: 180 hours at the contract rate of $145/hour = $26,100
   - Third-party geotechnical consultant fee: $8,400
   - Proposed total change order value: $34,500

Per Clause 8.3, we request that BlueRidge Engineering Services submit a formal change order proposal, including a detailed breakdown of hours by discipline and a revised programme, within ten (10) business days of this letter.

We ask that no work associated with this variation commence until the change order has been signed by both parties, in accordance with Clause 8.5. Work on the unaffected portions of the design should continue without interruption.

Please confirm receipt of this request and advise of any information you require to prepare your proposal.

Sincerely,

Marcus Feldman
